Key Items to Consider Before Transferring an Account

Our Products and Services

Whether you are considering a full or partial transfer, it is important to consider that not all firms offer the same investment products and the costs associated with those products may differ. You should fully understand the products and services available by either working with a Financial Professional. If you will be liquidating any assets at your previous firm, and/or upon the transfer of your account, there may be fees or taxes as a result of the liquidation that should be considered before transferring your account. We recognize clients have many choices and if you choose to have your assets at multiple financial firms, you should understand any impact that may have on your overall financial goals and the services offered to help you meet those goals.

Our Costs

In addition to investment product costs, understanding the holistic costs associated with your account or household is also an important factor to consider when transferring a portion or all of your accounts. Costs can be either short term, event based fees such as transactional based or termination fees, or they can be ongoing such as annual account or advisory fees. Please discuss the fees associated with your account or household with your Financial Professional to gain a complete understanding of the costs associated with implementing and maintaining your overall financial goals.

You should consider that brokerage accounts typically include investment-related expenses (such as sales loads, commissions, expenses of any mutual funds in which assets are invested, and investment advisory fees) and plan or account fees (such as administrative, account set-up, custodial, and access to a customer service representative). These fees and expenses will reduce the value of your account and return on your investment, and over time, these costs can make a significant difference in your account value. It is your obligation to review and carefully evaluate the specific features, including the administrative fees and expenses of your existing account before you transfer the account. Additionally, your Financial Professional may receive compensation related to your decision to transfer your account assets, creating a conflict of interest for your Financial Professional to recommend you transfer your account assets. You should carefully consider whether your Financial Professional's advice is aligned with your investment strategy and financial goals.

Other Considerations

Products and Costs are an important component of your overall financial picture, but if you tend to hold a large percentage of cash or have borrowing needs, understanding the alternatives available and the applicable interest rates are important as well.

Before you choose to transfer your account, the types of service, support and online resources should be considered alongside the products and costs.

Acknowledgement

By signing the enclosed transfer documents you are acknowledging that you have received the necessary information to make an informed decision to transfer your account.

Auction Rate Securities: Account Transfer Acknowledgement

Your auction rate securities were purchased prior to the transfer of your account to us. As a result, we are not responsible or liable for any prior recommendations or advice with respect to these securities nor are we under any obligation to provide you with any investment recommendation or advice with respect to the disposition or continued holding of these securities in your account following the transfer of your account.

We are not under any obligation to you:

- (i) to provide loans under margin agreements or otherwise secured in whole or part by the auction rate securities in your account;
- (ii) to purchase or continue to purchase any auction rate securities in periodic rate setting auctions or in secondary market transactions; or
- (iii) to provide liquidity for such securities. Many auctions for these securities are in failed status, meaning that holders of these securities are not able to sell these securities in the periodic rate setting auctions or in secondary market transactions and as a result, liquidity for these securities currently is greatly impaired.
